ABOUT ME

I used to work with various Adobe programs as a designer - handling layouts, creating banners, posters, creating logos, following a brandbook if needed, making various graphic design solutions.

Later on I was responsible for photographing various clothing in the studio, retouching photos, removing backgrounds, preparing catalogs and print materials. I learned everything on my own.

During my courses at Code Academy, I learned the basics of CSS, HTML, JS, React and Git and had a blast doing it. Hopefully, I will have a chance to learn more and get better.

I am a very curious person, I learn quickly, and I want to improve.

EXPERIENCE

2020- Freelance (photo retouching)

2014-2020 Designer
UAB "Intergrafika"

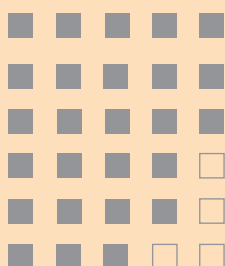

EDUCATION

2023 Front-end Serverless
Code Academy

2011-2016 Psychology Bachelor's Degree
Klaipeda University
